DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to a laminated fabric, classified in class 442, subclass 394.
 - II. Claims 21-25, drawn to a process of making, classified in class 427, various subclasses.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make other product since it does not require the use of a curing agent that comprises at least two amine moieties per molecule of curing agent as required by the product claimed.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Claim 1 is generic to a plurality of disclosed patentably distinct species comprising a curing agent comprising:
 - (1) an alkyl di-amine, (2) an alkyl tri-amine, (3) an ether di-amine, (4) an alkyl-ether diamine, (5) an alkyl-ether tri-amine, (6) a poly(alkyl-ether)di-amine, (7) a poly(alkyl-ether)tri-amine, (8) a poly(oxypropylene) di-amine, (9) a poly(oxypropylene) tri-amine, (10) a

polyetheramine, or (11) an amine with at least three amine moieties per molecule of curing agent.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. A telephone call was made to Christopher Hayden on April 8, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Norca L. Torres-Velazquez whose telephone number is 703-306-5714. The examiner can normally be reached on Monday-Thursday 8:30-4:00 pm and alternate Fridays.
